

Forever Ginkgo Plus®

Feed your creativity with Ginkgo Biloba, the legendary “brain tonic” dating back five millennia. Forever Ginkgo Plus® is a unique blend of four herbs. Ginkgo Biloba leaf extract, its chief ingredient, is combined with the powerful Chinese herbs of Ganoderma from Reishi mushrooms, Schisandra berries and cured Fo-ti.

The ginkgo tree is said to be the oldest surviving tree species. They live incredibly long (often over 1,000 years), and are extremely resistant to fungi and insects. Ginkgo Biloba is one of the most popular herbal supplements available in Europe and North America.

Extract from the ginkgo leaf yields flavonoids and terpenoids which strengthen capillaries. They also act as antioxidants. Ginkgo has been shown to increase circulation of blood to the brain. Reishi, Schisandra and Cured Fo-ti contain many biologically active constituents, and Cured Fo-ti is regarded by the Chinese as one of the most important anti-aging herbs. Together these herbs make Forever Ginkgo Plus and incredible “brain tonic.”
